

During the Partner *Summit*, the annual celebration for Cisco's partners

InfoGLOBAL awarded by Cisco Systems

Cisco names InfoGLOBAL "Solutions Partner" of the year in Spain and Mediterranean Region

Madrid, Spain –February 5, 2004 – InfoGLOBAL S.A announced today that it has received a Country Award from Cisco Systems. This award recognises InfoGLOBAL as Solution Partner of the Year in Spain and Mediterranean Region.

Luca Marinelli, Cisco Managing Director Channels, EMEA, describes the objectives of the awards to be announced during the Cisco Global Partner Summit, taking place from 12-13 February in Hawaii. *"We would like to recognize and celebrate our Award Winners as part of our Partner Summit Cisco Awards Program. They provide the evidence that the key to market success is close collaboration. In other words, fully capitalizing on the true benefits of partnership! For Cisco, the key to unlocking success is collaboration"*, said Luca Marinelli.

InfoGLOBAL has developed a number of innovative and competitive solutions that add value to Cisco platforms, providing the best solution for the client. There are two relevant case studies:

- Solutions for permanent broadband WiFi communications in trains, incorporating a wide range of technologies in radio systems such as band translators, cable radiating systems, data flow management including bandwidth assignment for QoS guarantee, security, etc, some of which are patent pending. Metro de Madrid (Madrid Underground) is one of the world pioneer customers and collaborators via the TEBATREN project (Broadband Telecommunications for Trains).
- Solutions for High Speed Access in rural areas. A complete solution from an operator's point of view that allows fast and cost effective deployment using satellite, radio links and WiFi systems, while maintaining Quality of Service (QoS), network management and service provisioning according to the needs of operators and users. Highly innovative work has been carried out, for example in the user terminal (CPE) in order to guarantee a fast, low cost and safe deployment. The roll-outs in the regions of Castilla-La Mancha and Castilla-Leon in central Spain are a good example, when considering the hundreds of base stations already in place.

Cisco is committed to helping its partners succeed and this award recognises InfoGLOBAL for their outstanding achievements over the last year”, said Ángel Porrás, Channel Manager of Cisco Spain.
